(5 Days Training Course)

Why Choose this Training Course?

Safety is a critical factor in the Oil, Gas and Petrochemical Industries, but without excellent leadership and guidance, as well as adopting the right behaviours it will fail. This training course has been specifically designed to equip Technical, Supervisory, Management and HSE professionals in the Oil and Gas sectors with the knowledge, skills and understanding to become effective Safety Leaders in this critical, high hazard industry.

On this training course you will learn about utilising leadership and management techniques to control your work environment, influence others; identify and control risks and hazards, as well as create a climate and culture for improved safety using key behavioural safety coaching and techniques. This training course is essential for those operating and working in high hazard and critical safety operations.

This training course will feature:

- How to utilise management and leadership criteria to improve Safety Leadership
- The key interpersonal and behavioural safety techniques to influence and improve overall safety
- Risk and hazard analysis to prevent incidents and accidents, and the correct procedures to handling these
- Help create, adapt and improve the safety climate and culture of the organisation

By the end of this training course, participants will be able to:

- Recognize & understand the roles and responsibilities of Safety Leadership
- Employ leadership and team working techniques to effectively manage safety on site
- Apply behavioural safety techniques to improve communication and safety culture
- Identify and determine critical risk identification and hazard analysis to prevent accidents and incidents
- Identify the criteria to improve the safety climate and culture across the organisation
